Global Veterinary Products

Locally Owned ✧ Vet Focussed

Global Veterinary Products proudly supplies a range of high quality, great value consumables that meet the everyday needs of veterinary practices.

The owners and managers of GVP bring many years of industry experience for the benefit of our customers. Having worked in practice, we understand the environment, and what works.

Try before you buy

We are confident that our products will perform well in your practice – but we also know you or your colleagues often need to see this for yourself. If you are a member of veterinary practice that would like to try any of our consumables, please contact us for a free sample – refer to page 17 for contact details.

100% Satisfaction Guarantee

We stand behind the quality of our products. If for any reason they fail to meet expectations we will promptly either replace the product, supply you with a suitable alternative, or provide other items from our range to an equivalent value.

EXPERIENCED LEADERSHIP

Graeme Dixon *BVSc, MAppFin, MBA*

Graeme's 35+ years in the veterinary industry has spanned clinical practice and senior commercial roles in animal health. Throughout his corporate and management consulting careers he's been grateful for the opportunity to also live and work in Europe and Asia. Graeme has visited numerous veterinary hospitals throughout these geographies, as well as his home region, Australia & New Zealand, to better appreciate their needs, preferences and experiences.

Having previously briefly worded with Glenda in practice, many years later Graeme found the decision to become business partners an easy one. As a co-owner of Globalvet since 2018, Graeme enjoys the opportunity to support practices get the most from GVP brand consumables in the care of their patients.

Glenda Sinclair-Gordon *MBA*

Glenda has 40 years of service to the veterinary industry. After first completing her studies in veterinary nursing, she worked in small animal practice in Brisbane for 10 years. She then shifted gears into a management career with a leading veterinary distribution business.

Glenda gained substantial commercial experience across sales, administration, logistics and inventory management functions. Drawing on her understanding of the day-to-day requirements and management of a veterinary practice, Glenda's main focus is on the customer and how best to solve their problems.

As well as her time spent at Globalvet, she is an active volunteer with a variety of organisations supporting animal welfare and wildlife rescue.

IV Administration Sets

GVP administration sets are specifically designed for veterinary use and enjoy wide acclaim for quality, value and durability.

- Longer than usual to provide greater versatility - e.g. large cages
- Designed to be stronger and more durable than typical human IV sets
- Suitable for use with IV pumps (pump calibration may be required)
- Distal end has inbuilt adapter – allows use of Luer slip OR Luer lock connection
- Slide clamp allows disconnection without altering the setting of roller clamp
- All GVP administration sets and accessories are latex-free

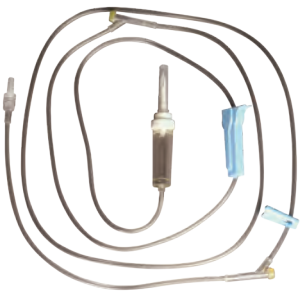

IV Fluids

- 60 drops / ml
- Patients <10kg
- 2.2m long
- Two injection ports - 1st at 300mm from patient, 2nd at mid-point of set
- Precise control at much lower cost than paediatric sets.

GVP Code IV10kg-

Barcode 9333559000018

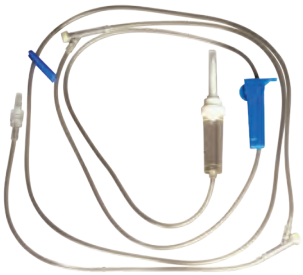

IV Fluids

- 20 drops / ml
- Patients >10kg
- 2.2m long
- Two injection ports - 1st at 300mm from patient, 2nd at mid-point of set

GVP Code IV10kg+

Barcode 9333559000001

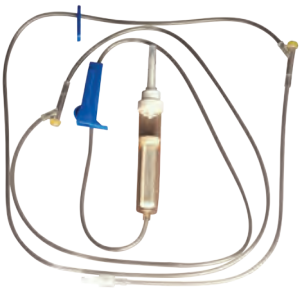

Blood or Fluids

- 20 drops / ml
- Patients >10kg
- Contains inbuilt mesh filter. Can also be used for IV solutions as alternative to IV10kg+ version.

GVP Code IVBLOOD10KG+

Barcode 9333559000025

IV Fluids – Extra-long 3.2m with needle-free port

- 20 drops / ml
- Ideal for larger patients / large cages
- One needle-free port for easy injection
- Avoids need to add extension set
- Facilitates piggy-backing (e.g. syringe pump)

GVP Code IVXLNF

Barcode 9333559000032

Dual IV Fluid Bag Adapter

NEW

Connect one administration set to two IV fluid bags

- Suits any IV administration set with standard bag spike
- Ideal for high flow / maximum fluid rates
- Provides for long duration fluid therapy without bag change
- Each connection has C-clamp to isolate supply

GVP Code	IVDUAL
Barcode	9333559000469

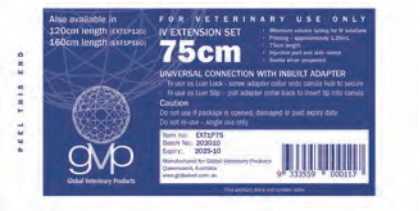

Minimal Volume Extension Set

- Minimal volume tubing for precise dosing: Priming volume ~0.5ml / 30cm
- Three lengths, to tailor for differing hospital / patient requirements
- Provides injection port and slide clamp
- Inbuilt adapter at distal end: provides Luer-slip or Luer-lock connection
- Medical grade 'memory tubing' retains shape and resists kinking

75cm Length

- Priming volume approximately 1.25 mL

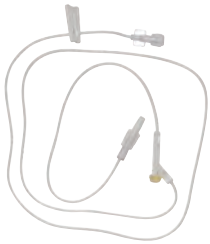

GVP Code	EXT1P75
Barcode	9333559000117

120cm Length

- Priming volume approximately 2.0 mL

GVP Code	EXT1P120
Barcode	9333559000124

160cm Length

- Priming volume approximately 2.7 mL

GVP Code	EXT1P160
Barcode	9333559000100

Microbore T-Connector Extension Set

Choose from three different T-connector configurations. To ensure you've selected the correct item check the product code, or pack colour. The T-Connector with cap provides an economical alternative where the removable injection port is not required.

T-Connector with **INJECTION PLUG**

- 12.8cm length. Priming volume ~0.3ml
- Proximal end: Female Luer lock with **removable injection plug**
- Distal end: Male Luer tip with fixed injection port
- Luer-lock collar to secure T-port to cannula. Includes slide clamp

GVP Code IVTCONMB

Barcode 9333559000209

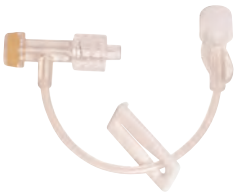

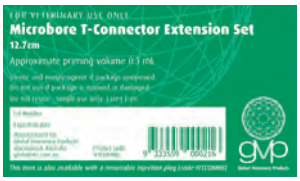

T-Connector with **CAP**

- 12.8cm length. Priming volume ~0.3ml
- Proximal end: Female Luer lock with **disposable cap** directly attach IV line, syringe, or needle-free port
- Distal end: Male Luer tip with fixed injection port
- Luer-lock collar to secure T-port to cannula. Includes slide clamp

GVP Code IVTCONMBC

Barcode 9333559000216

T-Connector with **NEEDLE-FREE PORT**

- 17cm length. Priming volume ~0.5ml
- Proximal end: Fixed needle-free port – directly attach IV line or syringe
- Distal end: Male luer tip with fixed injection port
- Luer-lock collar to secure T-port to cannula. Includes slide clamp

GVP Code IVTCONNF

Barcode 9333559000223

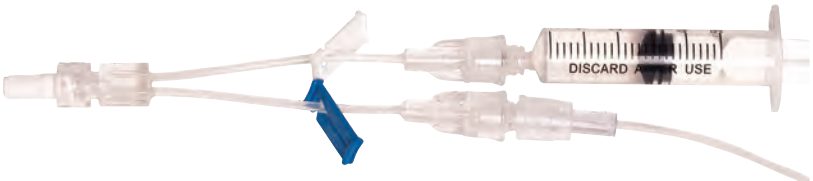

Twin Extension Set – Needle-free

- Dual-lumen extension set with two needle-free ports
- Connect IV line(s) directly to cannula or T-Connector without removing any fittings
- Medicate directly to IV line without needle
- Needle-free ports are self-sealing (swab prior to connecting) – reduces contamination
- Facilitates piggy-backing for CRI & syringe pumps
- 11cm length, anti-kink minimum-bore tubing, luer-lock fittings

GVP Code EXT2NF

Barcode 9333559000445

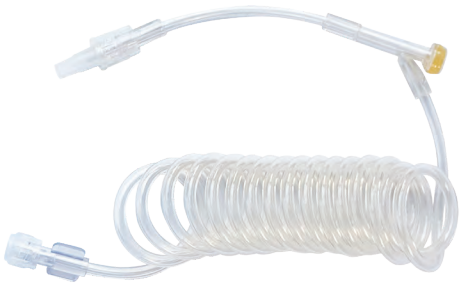

Directly attach syringe and/or IV line(s)

Spiral IV Extension Set

NEW

Connect to any IV administration set to extend reach

- 180cm long with injection port at patient end
- Spiral tubing provides 'spring' effect – reduces tangles
- Ideal for larger patients / larger cages

GVP Code	EXTSP180
Barcode	9333559000148

IV Accessories

GVP Injection ports and plugs are designed for use with IV cannulas, administration sets and extension sets. You have a choice of connections - luer slip or luer lock, including our needle-free version. Packed sterile as singles in a small easy-open blister.

Luer Slip Injection Plug

- Provides needle injection port via silicone diaphragm cap

GVP Code	IVPLGSLP
Fitting	Luer slip

Luer Lock Injection Plug

- Provides needle injection port via silicone diaphragm cap

GVP Code	IVPLGLL
Fitting	Luer lock

Dual (Combi) Stopper Plug

- Convenient way to close and seal IV lines
- Combination male & female luer-lock fitting
- Red, Pack of 50

GVP Code	IVCOMBIR
Fitting	Luer lock

Needle-free Adapters

Needle-Free Injection Port

- Quick and convenient - requires no needle
- Swabable cap. Suits any luer tip syringe, IV extension set or admin set
- Luer lock fitting on tip allows securing of lockable syringe or luer tip IV line

GVP Code	IVPLGNF
Barcode	Luer lock

Vial Access Spike

- Attaches to drug bottle/vial (20mm top)
- Allows easy drawing-up without a needle
- Fewer sharps used
- Avoids needle-stick injury
- Reduces contamination of multidose vials
- Fluid pathway minimum clearance is 1.0mm (larger than 18G)
- Sterile EO

GVP Code	VS20
Barcode	9333559000421

Needle-Free Transfer Spike

- Inserts into IV fluid bag for quick access
- Ideal for loading flushing (saline) syringes
- Safe and convenient - Avoids needle-stick injuries
- No more accidental piercing the side of fluid bag!
- Attach any luer tip syringe (Use inbuilt thread to secure a luer-lock syringe)
- Packed sterile in an easy-open blister pack

GVP Code	TRANSPIKE
Barcode	9333559000407

Enjoy the Versatility of Needle-Free Technology

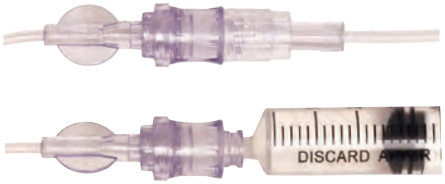

GVP needle-free accessories provide for safer, easier and quicker workflows

T-Connector with **fixed** NF port

IVTCONNF

Attach IV line and/or syringe to patient without needing to remove any fittings.

T-Connector and **detachable** NF port

IVTCONMBC + IVPLGNF

Attach IV line and/or syringe to patient without needing to remove any fittings.

Twin Extension Set with NF ports

EXT2NF

This end attaches to IV cannula or T-Connector

Attach IV lines and/or syringes to patient without needing to remove any fittings. Reduces contamination and aids 'piggybacking'.

Needle-free transfer spike for IV **fluid bag**

TRANSPIKE

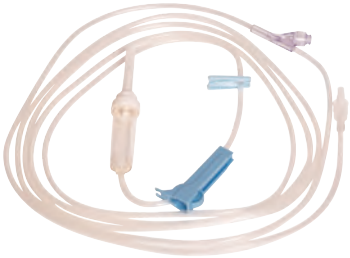

Load flushing syringes without using a needle – quickly, conveniently and safely.

XL IV Administration Set with **NF Y-Port**

IVXLNF

Attach secondary IV line, or insert syringe into Y-Port.

NEVER INSERT A NEEDLE INTO ANY NEEDLE-FREE PORT!

Endotracheal Tubes

- Cuffed (2.5 – 13mm) – low profile (olive) cuff with inflation valve
- Durable and flexible transparent plastic
- Full range of sizes (sizes indicated are internal diameter)
- Can be shortened by user if desired
- 2 to 11mm sizes in sterile package (12 & 13mm are packaged non-sterile)

Nylon Dog Slip Lead

- Simple slip-style nylon rope lead – blue and white colour
- Inexpensive: ideal for client loan/give-away and in-clinic use
- Nylon construction is impervious to urine or water and can be readily disinfected
- Proximal end has woven loop (handhold) and distal end has metal slip-ring

Type & Size Nylon Slip Lead 1.2m long including hand grip **GVP Code** LEADBW12 **Barcode**

Dental Care

Toothbrush

- Double-ended – small and large brush sizes, which suits animals of all sizes
- Angled head allows easier brushing of molars
- Dimensions 22cm long, 10-17mm wide
- Blister pack aids merchandising (suits J-hook)

Product	Toothbrush	**Packaging**	Blister pack	**GVP Code**	TBAUS-0503	**Barcode**	890129000070

Fingerbrush

- A low stress means to control dental plaque
- Made of soft plastic that is gentle on gums
- Extended bristle area maximises cleaning benefit
- Small hole in tip lets trapped air escape – easier to fit
- Tight fit? Simply drop in hot water – will stretch
- Blister pack can be merchandised (suits J-hook)

Product	Fingerbrush	**Packaging**	Blister pack (2 brushes)	**GVP Code**	FBAUS-0503	**Barcode**	890129000087
Product	Bulk Fingerbrush	**Packaging**	20 loose brushes in plastic bag	**GVP Code**	FB20PK	**Barcode**	

General Pet Care

Pet Piller

- A lower-stress way to administer tablets
- Maximises client compliance
- Helps avoid injury to novice pet parents
- Full ring design (for thumb) helps control
- Blister pack aids merchandising (suits J-hook)

Product	Pet Piller	**Packaging**	Blister pack	**GVP Code**	PETPILLR	**Barcode**	890129000278

Bamboostick®*

- Large, soft, super-absorbent cotton wool tip
- Allows safe cleaning of dog's ear canal
- Also ideal for cleaning of wounds and equipment (eg tubes)
- 100% biodegradable. Stick made from sustainable bamboo
- Length - 14 cm (4cm tip)

Product	BambooStick	**Packaging**	Pack of 50 (plastic bag)	**GVP Code**	BAMBSTX	**Barcode**	850646000304

Tick Twister®

Tick Twister* is the easiest and medically-preferred method of tick removal and avoids compression of the tick. For Ixodes spp, efficient removal may potentially reduce (neurotoxic) saliva ejection compared to clumsy removal via fingers or forceps.

As the name suggests, the device allows the tick to be grasped and rotated for easier removal. A tick mouthpart (rostrum) has backward angled spines that resist traction. Rotation of the tick allows these spines to disengage from the skin and flatten along the longitudinal axis, allowing the tick to be 'unscrewed' from the skin.

TRADITIONAL Blister Pack

- Simple one-piece durable design
- Hygienic plastic – easily cleaned
- Three sizes in each pack: S, M & L to match size of tick
- Recyclable cardboard blister-pack (suits J-hook)
- Supplied in 24-pack display box

Packaging	Recyclable cardboard pack within self-merchandising box of 24 packs	**GVP Code**	TICK24 (3)	**Barcode Single** **Barcode Box**	850646000533 850646000540

CLIPBOX Format

- Convenient carry case – Attach to keyring, dog lead or nurse pouch
- Four colours – blue, green, pink & lilac
- Three sizes in each clipbox: S, M & L to match size of tick
- Recyclable cardboard package – no plastic waste
- Supplied in 12-pack display box (assorted colours)

Packaging	Recyclable cardboard pack (suits J-hook) within self-merchandising box of 12 packs	**GVP Code**	TICK12 (3)	**Barcode Single** **Barcode Box**	850646000625 850646000632
